

# -School Campus Improvement Project...Garden-

Go from this.....

To this.....

TO THIS.....

## Who :

School staff, administrators, PTO, 21st Century Grant coordinators, Family/Caregiver volunteers, business partners, faith based school partners

## What :

Creating an area for students to learn and teachers to instruct in a unique setting helps students thrive! This garden space will help your campus come together for the purpose of growing food, enjoying beautiful plants, and for the common good of working together to create something beautiful on your campus!

## When and Where :

Finding the perfect spot is essential! Look for a central location on campus, ensuring that the water, runoff, and sun and shade needed is all just right!

Picking the time of year to begin this project is essential as well and will vary by geographical location of your campus.

**Why:**

Having your campus come together over a project creates pride and ownership for years to come! Stakeholders will CREATE A BUZZ around the beauty of your campus!

**How do I get started?:**

If you like this idea, contact Tawnya so she can set up a virtual meeting to go over your needs. This will allow her to guide you in a process specific to your campus!
